

JCM offers up to  
**40% subsidy**  
on PV panels and  
BOS articles

# Project Cooperation for Your Solar Power Plant

Profit from:

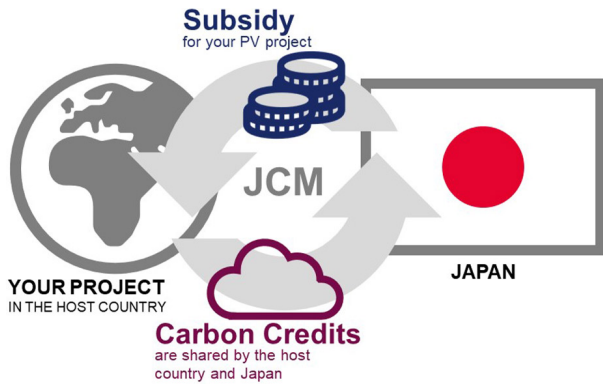

- ✓ Subsidies for projects in 17 countries
- ✓ Financial support
- ✓ Cooperation in project development and implementation
- ✓ Products based on 60 years of solar expertise

Your Solar Partner for Life

**SHARP**  
Be Original.

## JCM Subsidy Program

### Japanese Government subsidies

- The Joint Crediting Mechanism (JCM) is a project-based subsidy program initiated by the Government of Japan to facilitate the diffusion of low-carbon technologies in 17 different countries
- As a Japanese company, SHARP can be your door opener for obtaining the subsidy
- Benefit from up to 40% cost reduction on modules and certain BOS articles

Contact us now to see if your project qualifies for funding.

## Joint Project Development

### Project cooperation and development

- Cooperation in project development at any project stage
- Acquisition of project rights
- Cooperation in project implementation (EPC)
- Access to attractive financing options
- Projects: free-field installations above 10 MWp
- Region: focus is on Germany, other countries possible

If you are a project developer, EPC / installer or investor we can team up and do business together.
